## EXPERIENCE

---

- **Netcompany A/S** Copenhagen, Denmark  
*IT-Consultant* *Apr 2024 - Feb 2025*
  - **Team Lead:** Led developers and testers, accountable for delivery progress and direction. Contributed to PI Planning, ran meetings, managed workload and clarifications, provided time estimates, upheld code quality across front- and back-end, and kept scope aligned with client requirements and deadlines.
  - **Lead Developer:** Built two nation-wide mobile applications for a Danish government body from the ground up in React Native, owning development and maintenance and designing data flows and state management for scalability, maintainability, and reliable performance.
  - **Maintenance & Feature Work:** Maintained a complex national agricultural map solution in .NET/C# and Angular, covering bug solving, technical improvements, client communication, and feature analyses from proof of concept through estimation, implementation, and release.
  - **Azure DevOps:** Set up and managed Azure DevOps for the team, establishing a work structure from scratch, configuring build pipelines, and enforcing correct branch strategies.
- **Swace Digital** Uppsala, Sweden  
*Software Engineer* *Mar 2023 - Feb 2024*
  - **Headless React Project:** Consultant building a new front-end and implementing cron jobs for weather and housing data via API endpoints on the back-end. Worked on the LAMP stack with WordPress as CMS and GraphQL as data handler, ensuring high quality through close customer collaboration in CI/CD processes.
- **Plick AB** Stockholm, Sweden  
*Master's Thesis — Machine Learning* *Sep 2023 - Jan 2024*
  - **Fraud Detection:** Applied machine learning to research fraud detection through outlier analysis, identifying fraudulent users on a platform with more than one million active users.
  - **Neural Network:** Trained a neural network to process large datasets and BigQuery data using PyTorch, NumPy, Pandas, TensorFlow, and scikit-learn with high performance.
- **Techover** Stockholm, Sweden  
*Front-End Developer* *Feb 2020 - May 2021*
  - **End-to-End Developer:** Contributed to diverse projects from design to delivery, building scalable solutions in React and React Native with Redux state management, API integration, and prototype design.

## EDUCATION

---

- **Uppsala University** Uppsala, Sweden  
*M.Sc. in Sociotechnical Systems Engineering* *Aug 2018 – Jan 2024*
- **Yonsei University** Seoul, South Korea  
*Study Abroad — Computer Science (Computer Vision, Data Mining, Korean)* *Aug 2021 – Jun 2022*

## PROJECTS & EXTRACURRICULARS

---

- **Patrik och Ossian Webbtjänst HB (Co-Founder):** Co-founded and ran a web development company as a summer venture, showcasing business development, web design, and strategic planning.
- **Jarvis — Personal Assistant App:** Personal mobile app built in React Native with Redux as a global state manager.
- **English Teacher, Prime Readers:** Supervised students aged 9–14 in Seoul, reviewed their work, and provided constructive feedback.

## PROGRAMMING SKILLS

---

- **Languages:** TypeScript, JavaScript, Python, C#, .NET, SQL, GraphQL, Java, HTML & CSS  
**Technologies:** React, React Native, Next.js, Node.js, Angular, Azure DevOps, CI/CD, Git
